TechCorp Inc. — Annual Report 2024 | Business Risk Factors

1. **Market Competition:** Intense competition from Google, Microsoft, and Amazon continues to pressure pricing and market share in cloud services.
 2. **Regulatory Risk:** Increasing AI regulation in the EU and US may limit the deployment of our AI-powered products in key markets.
 3. **Cybersecurity:** A significant data breach could damage customer trust and result in material revenue loss and legal liability.
 4. **Supply Chain:** Dependence on Asian semiconductor manufacturers creates concentration risk in our hardware product lines.
 5. **Talent Retention:** Competition for AI engineers is driving up compensation.
- Management actively monitors and mitigates these risks through robust controls.
